Example; exact courses and sequence are subject to change.

I'm enjoying class a lot more and I've been going home every day and talking with my mom about what I did in school and how much I love it. Latin is really fun! It's the base that we take words from—it's challenging, but really helpful.

> Grade 5 Student

They're taught explicitly, implicitly too, but explicitly, how to ask for help, go to teacher office hours, how to improve yourself, how to take notes based on your learning style, etc. I do not think any other school teaches this stuff explicitly. I have seen such an immediate change in my younger one.
